Along with a nice ct% and speed that may someday be tapped, can we add power? In the final 15 games, he had 26 hits in 66 AB, with 4 HR and 9 doubles, for .394 BA and .742 Slg. Stay in the bidding.

A broken fibula robbed him of one of his best seasons. The benefit for you is that inattentive leaguemates might look at the abbreviated stats and figure that this 38-year-old took a step down. He didn't.

Duped owners with a stretch of .320 BA mid-season, and then hit .147 for September. His seasonal constancy is both blessing and curse -- you know what you'll get... and you know what you'll get.

0-4-.188 in 80 AB at HOU. Struggled in April (.154 BA), was sent down, returned in August... and struggled again (.220 BA). Getting shipped from Double-A didn't help. He has pop for sure. OK 24th man.

Had ct%/GB of 87/43 in 2004 and hit .273. Had same numbers this year and hit... .247. xBA agrees with .273. He should use his speed to run out of OAK -- anywhere else, he could reach 10 SB.

1-10-.219 in 105 AB at STL. In June, he had 12 hits, with an uncharacteristic 1.20 Eye. The trap set, he had 8 hits the rest of the way. Know your red flags. Leopards don't change their spots.
